DESIGNED BY APEX

ACV2 is our third-generation IBM BPM user interface toolkit. It builds on 100s of features from its predecessors and incorporates 10s of thousands of hours of BPM user interface design industry experience.

MOBILE AND RESPONSIVE

As IBM BPM consultants, we built ACV2 with the functionality we wanted. That includes mobile responsiveness for mobile-first design as well as traditional desktop-targeted development.

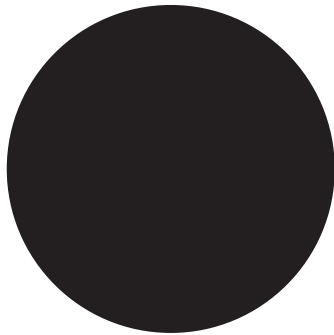

POWERFUL AND SIMPLE TO USE

Apex Coach Views enable business technical users to build beautiful, dynamic user experiences without deep web development skills.

EASY TO STYLE AND EXTEND

ACV2 has simple page structure and helper classes that make it easy to style your user interfaces to your company standards.

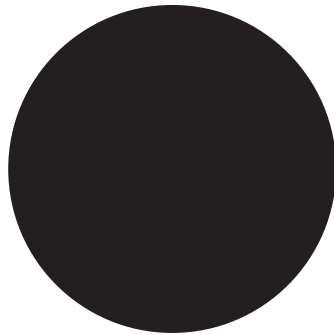

ACV2 has simple page structure and helper classes that make it easy to style your user interfaces to your company standards. You also customize the HTML templates for the delivered Apex Coach Views and/ or create new custom coach views using only basic HTML skills.
